---

Attached is a draft agenda for the May 23rd Project Management Meeting. Please let us know if you have any suggested changes/additions to the agenda. We are also asking the PH Project Management Team to provide input on the meeting objectives prior to the meeting so we can quickly review the objectives and move into detailed discussions (and tweak the agenda if needed). Please email objectives to John Marsh w/cc to Eric and Chip by noon Monday.

At our meeting earlier this week we also agreed to share our respective framework status reports/list of issues prior to the meeting. EPA's status reports for eco risk and modeling are attached. We will be providing a status report for human health on Monday. Also, to facilitate the 3A/3B sampling discussion we have attached our understanding of the 3A/3B sampling list as modified during our meeting on May 9th..
